**Effects of High-Power Laser Radiation** 2012-12-02 effects of high power laser radiation describes the interactions between high power laser beams and matter this book is divided into eight chapters that particularly focus on interactions such as heating melting vaporization and plasma production the opening chapters examine the laser properties types measurement techniques and safety aspects the succeeding chapters deal with a variety of physical phenomena and mechanisms of laser induced particle emission as well as the initiation and development of gas breakdown phenomena other chapters explore the effects and damage of various interactions in transparent materials and on biological systems the final chapter looks into the practical applications of the various laser effects to diverse technological fields this book will prove useful to scientists interested in the physical phenomena of laser effects and engineers interested in practical applications of laser effects

**Why Is America Different?** 2010-10-11 this book brings together a distinguished group of expert scholars from the elie wiesel center for judaic studies at boston university on the main areas of american jewish life from colonial jewish experience to images of jews in contemporary films this volume represents the fruit of this collective reflection and interrogation

**Censoring Hollywood** 2011-10-10 censorship has been an ongoing issue from the early days of filmmaking one hundred years of film censorship encompassing the entire 20th century are chronicled in this work the freewheeling nature of films in the early decades was profoundly affected by prohibition the depression and the formation of the legion of decency culminating in a new age of restrictiveness in the movies such powerful arbiters of public taste as will hays of the motion picture producers and distributors of america and joseph breen of the production code association fomented an era whereby films with contentious material were severely censored or even condemned this held sway until rebellious filmmakers like otto preminger challenged the system in the 1950s eventually resulting in the abandonment of the old regime in favor of the contemporary g through nc 17 ratings system

**Re: The Ash Lad** 1999-09-01 america s racial odyssey is the subject of this remarkable work of historical imagination matthew frye jacobson argues that race resides not in nature but in the contingencies of politics and culture in ever changing racial categories we glimpse the competing theories of history and collective destiny by which power has been organized and contested in the united states capturing the excitement of the new field of whiteness studies and linking it to traditional historical inquiry jacobson shows that in this nation of immigrants race has been at the core of civic assimilation ethnic minorities in becoming american were re racialized to become caucasian

**Whiteness of a Different Color** 2020-07-21 employing a wide range of examples from uncle tom s cabin and birth of a nation to zelig and personal best janet staiger argues that a historical examination of spectators responses to films can make a valuable contribution to the history criticism and philosophy of cultural products she maintains that as artifacts films do not contain immanent meanings that differences among interpretations have historical bases and that these variations are due to social political and economic conditions as well as the viewers constructed images of themselves after proposing a theory of reception study the author demonstrates its application mainly through analyzing the varying responses of audiences to certain films at specific moments in history staiger gives special attention to how questions of class gender sexual preference race and ethnicity enter into film viewers interpretations her analysis reflects recent developments in post structuralism cognitive psychology psychoanalysis and cultural studies and includes a discussion of current reader response models in literary and film studies as well as an alternative approach for thinking about historical readers and spectators

**Interpreting Films** 2003-01-01 the seven articles of this volume take up crucial aspects of information structure and grammatical form special attention is paid to the definition of topic focus and contrast to the language specific devices for expressing different types of these information structural notions and to the typological characterisation of languages as to discourse configurationality the investigation of grammatical relations includes the interplay between syntactic functions morphological case and thematic structure and the study of the functional and formal complexity of passive in germanic languages

**Structures of Focus and Grammatical Relations** 2015-04-15 what is it about tony soprano that makes him so amiable for that matter how is it that many of us secretly want scarface to succeed or see michael corleone as ultimately a hero what draws us into the otherwise horrifically violent world of the mafia in the mafia roberto m dainotto explores the irresistible appeal of this particular brand of organized crime its history and the mythology we have developed around it dainotto traces the development of the mafia from its rural beginnings in western sicily to its growth into a global crime organization alongside a parallel examination of its evolution in music print and on the big screen he probes the tension between the real mafia its violent often brutal reality and how we imagine it to be a mythical potpourri of codes of honor family values and chivalry but rather than dismiss our collective imagining of the mafia as a complete fiction dainotto instead sets out to understand what needs and desires or material and psychic longing our fantasies about the mafia the best kind of the bad life are meant to satisfy exploring the rich array of films books television programs music and even video games portraying and inspired by the mafia this book offers not only a social economic and political history of one of the most iconic underground cultures but a new way of understanding our enduring fascination with the complex society that lurks behind the sinister omertà of the family business

**The Mafia** 2007-05-07 why should we be tolerant what does it mean to live and let live what ought to be tolerated and what not catriona mckinnon presents a comprehensive yet accessible introduction to toleration in her new book divided into two parts the first clearly introduces and assesses the major theoretical accounts of toleration examining it in light of challenges from scepticism value pluralism and reasonableness the second part applies the theories of toleration to contemporary debates such as female circumcision french headscarves artistic freedom pornography and censorship and holocaust denial drawing on the work of philosophers such as locke mill and rawls whose theories are central to toleration the book provides

a solid theoretical base to those who value toleration whilst considering the challenges toleration faces in practice it is the ideal starting point for those coming to the topic for the first time as well as anyone interested in the challenges facing toleration today

*Toleration* 2006-01-21 with contributions by numerous experts

*Nonlinear Infrared Generation* 2007-08-06 western patients are increasingly travelling to developing countries for health care and developing countries are increasingly offering their skills and facilities to paying foreign customers the potential and implications of this international trade in medical services is explored in this book through analysis of the market

**Medical Tourism in Developing Countries** 2005-01-01 covering linguistic research on empty categories over more than three decades this monograph presents the result of an in depth syntactic and focus theoretical investigation of ellipsis in generative grammar the phenomenon of ellipsis most generally refers to the omission of linguistic material structure and sound the central aim of this book is to explain on the basis of linguistic theorizing of how it is possible that we understand more than we actually hear the answer developed throughout this book is that ellipsis is an interface phenomenon which can only be explained on the basis of the complex interaction between syntax semantics and information structure scholars of grammar and cognitive scientists will profit from reading this book

*Ellipsis and Focus in Generative Grammar* 1999 combining history politics and critical analysis he revisits the killing fields of cambodia documents the three month hutu machete genocide of about 800 000 tutsi villagers in rwanda and casts recent headlines from kosovo in the light of these other conflicts book jacket

**Prosecuting War Crimes and Genocide** 2016-04-07 flash crashes speed dating instant messaging from the devices we carry to the lives we lead everything is getting faster faster but where did this great acceleration come from and where will it lead in this vitally important new book robert colvile explains how the cult of disruption in silicon valley the ceaseless advance of technology and our own fundamental appetite for novelty and convenience have combined to speed up every aspect of daily life drawing on the latest research this book traces the path of this acceleration through our working and social lives the food we buy and the music to which we listen it explains how it s transforming the media politics and the financial markets and asks whether our bodies and the natural environment can cope as we race towards the future into a world packed with new technologies new ideas and new discoveries this scintillating and engrossing book is an invaluable must read guide to the wonders and dangers that await us

*The Great Acceleration* 2004 this book is about seven african nurse pioneers in kwazulu natal from 1920 to 2000 the author captures the early nursing activities of the 1920s to 1970 and then moves to nurses that entered the health services in the 1950s the author also presents two nurses that worked outside south africa i e did their pioneering nursing in saudi arabia and the united states of america the author does not scoop nursing out of its context but creates a narrative that resonates in lived experiences in a world dominated by the africanization of poverty the feminization of poverty globalization racism and xenophobia

**African Nurse Pioneers in KwaZulu/Natal - 1920-2000** 2007-07-02 in the depiction of the post world war ii economy two factors mattered for economic growth capital and labor economists were thus focused on macroeconomic policy in order to induce investment in capital while social institutions like education were oriented towards producing a labor force equipped to work in an economy consisting of large scale factories however in the leading developed economies globalization and technology have triggered a shift away from capital which can be moved to lower cost locations through downsizing and outsourcing of employment and towards knowledge audretsch argues in this book that the entrepreneurial economy is the strategic response to this shift in this economy a new growth policy has emerged focusing on promoting knowledge capital and entrepreneurship capital with programs like incubators science parks and start up programs in addition knowledge based geographic clusters have arisen like silicon valley cambridge and bangalore this book will provide a lens for understanding and interpreting the emergence of entrepreneurship policy audretsch will make connections between entrepreneurship and economic growth at the levels of individual firms and entire regions he concludes that entrepreneurship contributes to economic growth by serving as a conduit for knowledge spillovers injecting competition into the market for new ideas and increasing the amount of diversity this book should appeal to researchers and students in developmental economics

*The Entrepreneurial Society* 1999 this collection investigates the architecture of focus in linguistic theory from different theoretical perspectives research on focus and information structure in the last four decades has shown that the phenomenon of focus is highly complex the theoretical approaches manifold and the data highly sensitive the main emphasis has been placed on the integration of the notion of focus in generative grammar in recent years however the approaches to focus and information structure underwent a radical change in perspective the theoretical concept of focus its related terms and phenomena became the object of research along with it the research questions shifted instead of locating focus in the architecture of grammar linguists investigate the architecture of focus itself the central underlying idea of this collection is to document this change in perspective with the aim of isolating essential keystones and research areas in both the theoretical and empirical domain the book is structured accordingly following the introduction there are four main sections the general section discusses the theoretical foundations of focus within grammar the second section hosts papers which investigate the representation of focus and topic at the syntax pragmatics interface the third section discusses the phonological representation of focus and its relation to meaning the papers of the final section investigate different types of focus constructions in a variety languages the collection of papers on the architecture of focus its interpretation and representation mirror the establishment of the focus research field

*Eighteenth-century French Drawings in New York Collections* 2006-01-01 are there some things we can never think or know let alone do in this fascinating book acclaimed author john barrow reveals the often paradoxical limits on knowledge and

achievement and shows that the notion of impossibility has played and continues to play a striking role in our thinking and in the way in which we understand the universe and ourselves what are the true limits of science and human endeavour the end of each century leads to a stocktaking of human achievement and our expectation about the future this new book by john d barrow looks at what limits there might be to human discovery and what we might find ultimately to be unknowable undoable or unthinkable weaving together a tapestry of surprises barrow explores the frontiers of knowledge taking in surrealism impossible figures time travel paradoxes of logic and perspective theological speculations about beings for whom nothing is impossible all stimulate us to contemplate something more than what is with sufficient time and money at our disposal why should we find anything impossible barrow explores the limits that may be imposed upon a full understanding of the physical universe by constraints of technology computes cost and complexity he considers how the nature of the universe's structure prevents us from answering the deepest questions about its beginning its structure and its future and he delves into the deep limits imposed by the nature of knowledge itself which have profound implications for any quest for complete knowledge they take us into the debates over the problems of free will and consciousness g oml del s famous theorem about our inability to capture the truths of mathematics by rules and axioms is explored to see if it has any implications for science clearly and engagingly written and using simple explanations this book reveals that impossibility is a deep and powerful notion that any universe complex enough to contain conscious beings will contain limits on what those beings can know about their universe that what we cannot know defines reality as surely as what we can know impossibility is a two edged sword it threatens the completeness of the scientific enterprise yet without it there would be no laws of nature no science and no scientists in this illuminating well written account of limits with capital I john d barrow chronicles and explains the limits of science as a reality generation mechanism and why it matters so for about as good an account as you're going to get of where science stops read this book it won't tell you any final answer but the journey is far more interesting and important than the destination nature

The Architecture of Focus 1971 this is a study of tumultuous transformations of kinship and intimate relationships in american horror fiction over the last three decades twelve contemporary novels by ten women writers and two whose work has been identified as women's fiction are grouped into four main thematic clusters haunted houses monsters vampires and hauntings but it is social scripts and concerns linked directly to intimacy and family life that structure the entire volume by drawing attention to how the most intimate of all social relationships the family supports and replicates social hierarchies exclusions and struggles for dominance the book problematises the source of horror the consideration of horror narratives through the lens of familial intimacies makes it possible to rethink genre boundaries to question the efficacy of certain genre tropes and to consider the contribution of such diverse authors as kathe koja tananarive due gwendolyn kiste elizabeth engstrom sara gran and caitlín r kiernan

**Impossibility : The Limits of Science and the Science of Limits** 2023-06-15 focus background structure has taken center stage in much current theorizing about sentence prosody syntax and semantics however both the inventory of focus expressions found cross linguistically and the interpretive consequences associated with each of these continue to be insufficiently described this volume aims at providing new observations on the availability and the use of focus markings in romance languages in doing so it documents the plurality of research on focus in spanish portuguese french italian and romanian topics covered include constituent fronting and clefting the position of subjects and focus particles clitic doubling of objects and information packaging in complex sentences in addition some contributions explore focus background structure from acquisitional and diachronic angles while others adopt a comparative perspective studying differences between individual romance and germanic languages therefore this volume is of interest to a broad audience within linguistics including syntacticians semanticists and historical linguists

**House of Horrors** 2008 this study reveals the world of sufi ritual with particular reference to two major sufi orders it

examines the ritual and practices of these orders and surveys their organisation and hierarchy initiation ceremonies and aspects of their liturgy such as dhikr litany and sama mystical concert comparisons are made with the five pillars of islam arkan and the sufi rituals together with the arkan are examined from the perspective of theology phenomenology anthropology and semiotics the work concludes with an examination of the sufi in the context of alienation this is a major work which highlights the importance of sufi ritual and locates it within the broader domain of the islamic world  
*Quirk's Marketing Research Review* 2013-08-24 the notion of focus structure in this work refers to the distinction between categorical thematic and identificational sentences the central claim is that the syntactic representation of every sentence has to encode which of these types of focus structure is realized this claim is discussed in great detail with respect to syntax intonation and semantics within the framework of the minimalist program it is shown that the incorporation of focus structure into syntax offers new perspectives for a solution of vexing problems in syntax and semantics for example fronting preposing topicalisation is treated as a syntactic operation which clearly belongs to core grammar i.e. is not optional or stylistic the semantic notion of quantifier raising is dispensed with in favour of a focus structural treatment of phenomena which gave rise to it the book appeals to generative linguists and to functional linguists who do not believe in an unbridgeable gap between the formal and functional analysis of language

**A Guide to Third Generation Coaching** 2009-06-18 integrating the psychology of love and creativity this pioneering book explores both how a couple's involvement as lovers influences their creative collaboration and how working together affects their relationship representing a variety of genres painting sculpture photography and installation art the celebrated couples profiled here include among others christo and jeanne claude elizabeth diller and ricardo scofidio and kristin jones and andrew ginzel intrigued by this process of intimate creativity psychologists irving and suzanne sarnoff themselves partners in love and work decided to conduct in depth interviews with partners in visual art because they defy the supremely individualistic tradition of their field whatever their age or sexual orientation these artist couples combine their talents to form a collective identity as a professional team passionately intense about their shared commitment they communicate endlessly to resolve conflicts and reach consensus providing mutual validation and support they increase their productivity and the quality of their work they minimize their fear and frustration and enhance their pleasure in being together the authors also draw on historical and contemporary literature about similar couples ranging from jean arp and sophie taeuber to gilbert and george to claes oldenburg and coosje van bruggen stimulating and engaging this book highlights the features of a unique collaborative process considers the connection between creativity and sexuality and suggests possibilities for any couple to expand their intimacy

*Focus and Background in Romance Languages* 2014-03-18 the 6th edition of this established text is streamlined to a more manageable format with the appendices moved to the web site and a significant shortening of the main text there is a greater focus on the global analysis of industry and competition and analysis of the internal environment in consultation with feedback from their adopters the authors have concentrated on the fundamentals of strategy analysis and the underlying sources of profit this reflects waning interest among senior executives in the pursuit of short term shareholder value as ever students are provided with the guidance they need to strategic planning analysis of the health services environment internal and external and lessons on implementation with additional discussion of organizational capability deeper treatment of sustainability and corporate social responsibility and more coverage of the sources of organizational inertia and competency traps this edition is rich in new examples from real world health care organizations chapters are brought to life by the introductory incidents learning objectives perspectives strategy capsules useful chapter summaries and questions for class discussion all cases and examples have been updated or replaced in this edition the teaching materials and web supplements have been greatly enhanced with power point slides to give lecturers a unique resource

*Sufi Ritual* 1869 no other place on earth is as full both of promise and of dread as the city it is at once alienating and exciting these concentrations of people have not however come about as the result of vast immutable impersonal forces but because of human choices the worsening or betterment of urban life will also be the result of choices our choices that cities display and represent the personal desires of their inhabitants is central to joseph rykwert's argument in the seduction of place insisting that they are the physical constructs of communities he travels through history to trace their roots in ancient times and outlines current attempts and future possibilities to improve the metropolis rykwert includes a broad range of urban landscapes 18th and 19th century paris and london the current sprawl of mexico city and cairo planned cities like brasilia and finally new york the world capital always opinionated and often controversial rykwert assesses how and why urban projects from the past succeeded or failed and what lessons can be drawn from them for the future ultimately the seduction of place is a deeply felt and powerfully reasoned call for a commitment by every citizen to the creation of a more humane place to live

**An Elementary Treatise on Analytical Geometry** 2004-04-29 taking a multidisciplinary approach this book presents an insightful exploration of the theoretical and practical advances in women's health care the opening part examines the various shapes that a new framework in women's health might take such issues as using the male experience as the norm reducing women to merely reproductive entities and promoting the notion of biological primacy are addressed in the second part contributors carry the argument for reframing women's health into the sociopolitical arena looking at women in the third world and at integrating women's health into health care reform part three examines significant issues dealing with reproduction and sexuality while part four focuses on the impact of violence and

**Focus Structure in Generative Grammar** 2002-11-05 the papers included in the volume phonetics and phonology interactions and interrelations are concerned with some of the multiple possible forms of interactions and interrelations in phonetics and phonology the phonetic and or phonological nature of speech patterns segmental and prosodic interactions and interactions between segments and features both in child and in adult language combining perception and production

data and doing so from theoretically as well as experimentally oriented perspectives the book is unique in the universe of recent publications for its topic wide scope and coherent thematic content it is of interest to all researchers teachers and students in the fields of phonetics and phonology as well as to those interested in the interplay between production and perception the organization of grammar and language typology in general phonetics and phonology interactions and interrelations may be a useful companion to all those wishing to widen and deepen their knowledge of the sound structure of language s
