the remarkable story of one man s journey to leadership of the world s largest energy company the caravan goes on is the first published inside account of the workings of the corporation by a ceo and represents a significant addition to the literature on the turbulent development of the world s oil industry frank jungers former president chairman and ceo of the petroleum giant aramco tells the inside story of his three decades in saudi arabia 1947 1978 with the world s largest oil producing company a north dakota farm boy jungers rose to the top of one of the most important hydrocarbon enterprises ever a company that eventually found itself responsible for nearly one quarter of the world s oil resources he writes of his face to face encounters with king faisal and other saudi leaders and his role in steering the company through major international crises that included the 1973 arab israeli war the dramatic oil price increases of the 1970s the arab oil embargo and the opec hostage incident of 1975 central to jungers story is his role in helping to develop aramco s saudi workforce in preparation for the eventual transfer of company ownership from four american oil majors to the government of saudi arabia he explains the unique nature of the ownership transfer which was remarkably different from the bitter nationalization process seen in iraq libya iran and venezuela jungers describes how aramco and the kingdom of saudi arabia in an important sense grew up together and he highlights the crucial role played by aramco in the development of the young nation s infrastructure and economy the caravan goes on describes the origins of the petroleum industry in saudi arabia with the granting of a concession in 1933 to a subsidiary of standard oil of california the first of aramco s four oil company parents jungers talks of his own origins as the son of farmer in north dakota the family s migration westward due to drought and depression and his engineering studies at the university of washington jungers began his career in saudi arabia working at ras tanura site of aramco s first oil refinery and oil tanker terminal he describes how aramco built its initial workforce consisting of americans italians saudis and other nationalities he explains how it soon became clear that the future of the saudi oil industry belonged not with foreign oil interest but to the people of saudi arabia and he relates how he and others worked

to give Saudis the training and incentives needed to take over and successfully operate what would become the world's premier oil producing and exporting company at the same time Aramco with its technological expertise and its access to international specialists began playing a central role in the development of the Kingdom of Saudi Arabia. The company with support and encouragement of the Saudi Kings took a lead role in building healthcare agriculture the railroads the electric grid and other sectors of the Saudi economy. The story of the King Faisal era including the monarch's role in the oil price issue the Arab oil embargo and his closed door meetings with the King and his key advisers including oil minister Shaikh Ahmed Zaki Yamani are vividly described as well as the shock of King Faisal's tragic death and the tense moments of the OPEC hostage incident that began in Vienna and ended in North Africa. This personal colorful and up close view is required reading for oil industry watchers as well as those interested in big business geopolitics America's role in the Middle East and the extraordinary transformation and emergence of modern Saudi Arabia since oil was discovered in its eastern province.

Irvine Anderson carefully reconstructs the years between 1933 and 1950 and provides a case study of the evolution of U.S. foreign oil policy and of the complex relationships between the U.S. government and the business world. Originally published in 1981, the Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

When Mega Goes GIGA 1985

There is a renaissance that is occurring in chemical and process engineering and it is crucial for today's scientists engineers technicians and operators to stay current with so many changes over the last few decades in equipment and processes. Petroleum refining is almost a living document constantly needing updating with no new refineries being built. Companies are spending their capital retooling and adding on to existing plants. Refineries are like small cities today as they grow bigger and bigger and more and more complex. A huge percentage of a refinery can be changed literally from year to year to account for the type of crude being refined or to integrate new equipment or processes. This book is the most up to date and comprehensive coverage of the most significant and recent changes to petroleum refining presenting the state of the art to the engineer scientist or student. Useful as a textbook this is also an excellent handy go to reference for the veteran engineer. A volume no chemical or process engineering library should be without. Written by one of the world's foremost authorities this book sets the standard for the industry and is an integral part of the petroleum refining renaissance. It is truly a must have for any practicing engineer or student in this area.

the pengerang integrated petroleum complex pipc is a huge development that has emerged on the east coast of johor comprising petronas largest refinery facility and numerous ancillary and supporting industrial areas it is pegged to diversify malaysia s petrochemical industry and reap the benefits of the area s fortunate position on international maritime trade routes while initial responses to the pipc development were of concern for singapore s oil and gas business the island nation s long reputation and position in the industry means that the pipc has some steep learning curves to traverse before coming on par with its southerly neighbour however the pipc is likely to provide a solution to singapore s limitations in terms of costly services and limited land space it may also rejuvenate an industry now seen by some smes to be somewhat stagnant while there are myriad global trends that may inhibit the complete success of the pipc it seems to be well placed to provide economic spillover benefits for johor and malaysia even if it does not become a top regional player it will be able to meet local demands for euro 5 quality products the pipc received a boost with saudi aramco s commitment to invest in the refinery and petrochemical integrated development rapid project more investments may come on board when the refinery begins operations in 2019 a full assessment of pipc s success or failure can be conducted once other announced developments are completed and full operations begin
