Design Wise

2007

thyer and myers have written an easy to read primer on the topic of empirically evaluating the outcomes of social work practice this resource for social work students graduate and undergraduate and for social work practitioners presents outcome studies using both group research and single case designs unlike other books dealing with the topic of evaluating practice which use theoretical cases thyer and myers use real life examples of evaluating social work practice ranging from those fairly low on the scale of internal validity to those that are pretty rigorous the book begins with a refresher on evaluation research provides a balanced approach to both single system and group evaluation designs and closes with a discussion of ethical issues myths misconceptions and practical considerations in evaluation back cover

A Social Worker's Guide to Evaluating Practice Outcomes

1996

excerpt from a guide for evaluating prevention effectiveness this technical report is intended to be used i as a basis for training evaluator practitioner teams to collaborate in the design and implementation of useful evaluations it is organized around the idea that a useful evaluation depends on prevention evaluators working closely with practitioners to design feasible evaluations practitioners should then support evaluators in their efforts to assess accurately the nature and effects of prevention programs this document presents both general materials on how evaluation fits into the practice of prevention and technical details of implementing an evaluation plan the combination will give prevention staff common ground on which to build chapter 1 of this guide asserts that useful evaluations are tailored to intervention type and stage of development this information will be useful to preventionists as well as evaluators chapter 2 describes types of evaluation and evaluation outcomes it also discusses the problem of credibly attributing observed effects to the prevention intervention practitioners and evaluators alike should be familiar with this basic information

chapter 3 outlines several experimental and quasi experimental evaluation designs though of limited value to experienced evaluators the information will be useful to prevention administrators who may lack understanding of various research designs about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Managing Better 03: A Guide to Self-Evaluation

1982

a supplementary guide for students who are learning how to evaluate reports of empirical research published in academic journals your students will learn the practical aspects of evaluating research not just how to apply a laundry list of technical terms from their textbooks each chapter is organized around evaluation questions for each question there is a concise explanation of how to apply it in the evaluation of research reports numerous examples from journals in the social and behavioral sciences illustrate the application of the evaluation questions students see actual examples of strong and weak features of published reports commonsense models for evaluation combined with a lack of jargon make it possible for students to start evaluating research articles the first week of class the structure of this book enables students to work with confidence while evaluating articles for homework avoids oversimplification in the evaluation process by describing the nuances that may make an article publishable even though it has serious methodological flaws students learn when and why certain types of flaws may be tolerated they learn why evaluation should not be performed mechanically this book received very high student evaluations when field tested with students just beginning their study of research methods contains more than 60 new examples from recently published research in addition minor changes have been made throughout for consistency with the latest edition of the publication manual of the american psychological association
